Delivering On Our Promise to Minnesota

Minnesotans benefit from the University of Minnesota’s breadth and depth of expertise across our health sciences schools and programs. Together, we discover new and better treatments and cures; deliver a robust educational experience for future health care professionals; and provide state-of-the-art patient care.

Workforce

*Improve the health of Minnesotans by addressing the health care workforce needs throughout the state.*

**Goal 1:** Conduct a thorough analysis to quantify and assess the current shortages and mismatches within Minnesota’s health care workforce.

**Goal 2:** Create interventions to address the identified workforce gaps by leveraging interprofessional collaborations.

Rural

*Equitably advance rural health in Minnesota through academic excellence in interprofessional education, research, care and community engagement.*

**Goal 1:** Expand the pool of health sciences professionals trained for interprofessional practice statewide.

**Goal 2:** Be the primary trusted partner for addressing statewide health needs.

Practice

*Realize primary care delivery transformation models to advance overall health.*

**Goal 1:** Build collaborative practices that promote equitable care models.

**Goal 2:** Utilize integrative research and outcomes to inform evidence-based care and primary care-transformation strategies.

**Goal 3:** Establish a clear and structured organizational framework for implementing a One Health approach to research and education across the health sciences and the University.

Underserved

*Reduce health disparities in Minnesota by addressing the needs of the state’s diverse populations.*

**Goal 1:** Increase the number of graduates providing care for Minnesota underserved communities through targeted recruitment and retention initiatives.

**Goal 2:** Expand community engagement opportunities to advance health in the Minnesota ecosystem.
